NOTE: When sending your A-key to ANI, make sure that letters and numbers are transferred VERY carefully and correctly. Letters should be typed in Upper Case. In the text box that is displayed by the Brainmaster software which shows the A-Key the letter I is indicated with a hoizontal line on top and bottom of the vertical line. The letter O is plain without a line from top to bottom. The number Zero (0) shows a line from top to bottom. It is best to specify if a 4-character grouping contains a Zero or a letter "O" with a comment after the A-key.   For example for AB0C, you would state "in the AB0C group there is a Zero"; or for XOYZ, "there is a letter "O" in the XOYZ group".
